REVISED TRAFFIC PATTERN
Effective 23 April 07

SUBJECT: "A" Avenue and Sisisky Blvd Intersection OPENING

"A" Avenue will open 23 April. The Traffic Signal at Intersection of "A" Avenue and Sisisky will be flashing "YELLOW" and traffic control barriers will remain in place on Sisisky Blvd. Motorists should abide by posted speed limit signs along Shop and A Avenue. There will only be THRU TRAFFIC at this intersection (No turning left or right on Sisisky Blvd since construction crews will continue to work on Sisisky Blvd.; and the reduced speed limits on 1st, 2nd, 3rd, 5th & C Avenue will remain in effect.)

The opening of "A" Avenue will provide better access for patrons entering the Lee Ave. Gate traveling to the Post Exchange, Commissary, and the Service Station as well as Shop Road Gate motorists/POVs traveling to facilities on west side of the installation. It allows for better traffic flow across Sisisky Blvd. plus it reduces traffic flow on "C" Avenue.

NOTE: "A" Avenue Intersection has been closed since 2 October 06 to facilitate the Roadway Improvements project on Sisisky Blvd. Per contract, the remainder of Sisisky Blvd. is expected to be closed until 30 Sept 07, but sections may be opened before then depending upon work completion. Once Sisisky Blvd is entirely OPEN to TRAFFIC, you will notice widened lanes with raised medians, new traffic signals, curb and gutter, new pavement, new street lights, new sidewalks, pedestrian pushbutton signals and new pavement markings (crosswalks, centerlines, arrows, stop bars, etc).
